Re: WTKS(AM), Savannah, Georgia
Facility Identification Number: 8589
Capstar TX Limited Partnership
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed September 4, 2007, on behalf of Capstar TX Limited Partnership (Capstar). Capstar requests extension of the special temporary authority (STA) granted on March 7, 2007, to operate Station WTKS during nighttime hours with an emergency nondirectional antenna and reduced power.¹ In support of the request, Capstar states that it has replaced the station's nighttime tower which collapsed, but that the nighttime directional antenna parameters remain at variance.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted. We note that Station WTKS has been restored to nighttime directional operation; the STA will be modified accordingly.

¹ WTKS is licensed for operation on 1290 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED, with modification as discussed above. Station WTKS may continue to operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. It is anticipated that an application for direct measurement of operating power will be filed prior to the expiration date below. Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 6, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
